---

As a frontend developer, I build the visual part of websites and apps that users interact with. I turn designs into working web pages using Next JS, React Vite, Typescript, React Hook Form, Zod, Axios, Tanstack Query, ShadCN, Tailwind CSS, CSS, Zustand, Context API and other libraries that can help to develop the features. I make sure everything looks good, my code clean and easily to read and make a reusable components. I also connect the frontend to backend APIs to show real-time data, and I test my code to make sure it works smoothly. I work closely with designers, backend developers, and product teams to bring ideas to life and improve user experience.

EXPERIENCE & PROJECTS

Front-End Software Engineer (Multisys Corp. – Paranaque City)   **Jun 2024 - Current**

Next JS |React Vite | Javascript | Typescript | Tanstack Query | Tailwind CSS | CSS
